REPORT

ON THE

TRANSFRONTIER TRADE OF BURMA

AND THE ADJOINING FOREIGN COUNTRIES

DURING THE YEAR 1910-11 AND THE TRIENNIAL PERIOD ENDING 31st MARCH 1911.

1. *Form of Report.*—The trade between Burma and the adjoining Foreign States during the triennial period 1908-09 to 1910-11 is reviewed in this report, which is the eighth of its kind issued in this Province.

2. *Reorganization of the Trade Registration Department.*—During the triennial period under review the reorganization of the Trade Registration Department, was sanctioned and carried out. Supervisors were appointed to the Myitkyina, Mandalay, Meiktila and Thatôn Circles, in addition to the one already serving in the Bhamo Circle. Frontier District Officers were invited to report as regards the trade routes in their Districts, and after careful investigation and consultation with the Superintendent, Inland Trade Registration Department, stations on the most important and frequented trade routes were selected for purposes of registration. Twelve new offices were thus opened, and the total of registering stations is now 41.

A language allowance of Rs. 5 for each of the transfrontier languages known by them was granted to Trade Registration Clerks in order to encourage the study of these languages and so ensure a more accurate record of trade. The recommendations made in the Report of the Committee on Indian Trade Statistics have now been fully carried out and during the triennium there has been an improvement in the registration of the Transfrontier Trade.

3. *Registration Stations.*—Consequent on the reorganization of the Inland Trade Registration Department the following changes were made. In the Myitkyina District the permanent office at Kasu on the Sima Road was made into a seasonal office for five months in the year, as there is little or no traffic during the rains. Another seasonal office was opened at Nanti with a view to intercept the trade from the Kachin Hills, which eventually enters Mogaung and Myitkyina. A permanent office was opened at Kamaing to register the trade with the Hukong Valley and the Jade Mines, which enters Mogaung by two routes, one by road and the other by the Mogaung River. Statement No. III, page 42.

In the Bhamo District the Nanhlaing Office was closed and another opened at Mopein about a mile and a half below Nanhlaing in order to intercept the trade from Nalôn and Alawpun which crosses the Taping at Helôn-Mopein ferry. The site is an excellent one as it not only registers the Helôn-Mopein trade but also that which comes along the Nampoung-Nantabat road, and used to be registered at Nyaungbinyat. The need for this latter office consequently ceased and it was closed. Although the Mingoon office has been closed, trade continues to be registered there by the Supervisor during the rains and by the Apprentice Clerk and Trade Clerk of Wekkôn during the dry season, as there is a Kachin Waing attached to the building and Kachin Traders still encamp there. Two seasonal offices were opened, one at Tatkale for six months in the year in order to register the trade with the Northern Shan States and Shan Chinese Countries, the other at Sikaw, for five months in the year, to register the trade of the Northern Shan States which has hitherto escaped registration on that route.

In the Ruby Mines District the Kyauktalôn office was temporarily opened for the purpose of ascertaining the volume of traffic by this route with a view to the construction, if the trade proved sufficient, of a road connecting Mogôk with the Mainglôn States. The office was later converted into a permanent office and records trade with the Northern Shan States. Myitsôn and Nayôk offices were opened on the 1st January 1909 to register trade with Western China as well as with the Northern Shan States. The registration was at first entrusted to the village headmen, but this proved unsatisfactory and the offices were closed for the greater part of 1910. They were re-opened in November 1910 and placed in charge of paid trade clerks.

In the Kyaukse District the Ingôn office is open for the dry season only, as the locality is very unhealthy in the rains, during the six months of which the office is moved to Langwa. A new office was opened at Lungyaw on 24th December 1910 in order to register trade by the HawMyoza's new road from Si-Kamgyi to Myittha, as a large volume of traffic was being diverted to this route.

There were several changes in the Yamèthin District. The Pyinmana office was closed and a new office opened at Thayetkôn, as there is a larger volume of trade passing through the latter station than through the former. At Tatkôn (Ywathit) where traffic formerly escaped registration, an office was opened to register trade with the Southern Shan States. Pyawbwè bazaar and *Pôngyi Kyaung* were closed as a good deal of the export trade is registered by the Trade Clerks at Yebôkson.

Two new offices were opened in the Toungoo District, one at Leiktho permanently and another at Kyaukkyi for 5 months in the year during the open season, as there is considerable trade with the Southern Shan States and Karenni, which was hitherto not recorded. The office at Wagôn in the Tavoy District was closed, as trade along that route fell away altogether. The changes above described have resulted in considerable improvement in the registration of the Transfrontier Trade, and the Statistics are now more accurate.

The Map which accompanies this report shows the position of the Trade Registration stations and the Seasonal offices, along with the taxing stations in, and the principal trade routes to, Foreign Countries.

4. *Cost of Establishment.*—The cost of establishments at outstations for the year 1910-11 was Rs. 17,727 and at Headquarters Rs. 11,406. The average cost during the triennial period under review was Rs. 16,160 at out-stations and Rs. 11,546 at Headquarters, an increase of 25 per cent. and 35 per cent. respectively over the cost during the previous triennium. The increase is due to the introduction of the reorganization scheme.

5. *System of Registration.*—The system of collecting and tabulating trade statistics has remained unchanged during the period of report. To the list of articles comprised in the transfrontier trade Garlic and Oranges, hitherto shown under the head of fruits (other kinds), Lead which was formerly included under Metals (other sorts), Bird's Nests and Condensed Milk which were formerly classed as provisions (other kinds), and Cigar Wrappers (*Thanatpet*) which were included in the head of all other articles of unmanufactured merchandise, have been added as separate heads. The volume of trade in these goods justifies a separate and distinct classification.

6. *Inspections.*—Annual inspections of Trade Registering Stations were made by Mr. P. L. DeSantos, Superintendent of the Inland Trade Registration Department, who visited stations in the Myitkyina, Bhamo, Ruby Mines, Mandalay, Kyauksè, Meiktila, Yamèthin and Toungoo Districts. He supervised the introduction of the re-organization proposals in these districts and by March 1909 complete effect had been given to the scheme. For this Mr. DeSantos deserves credit. Care was exercised in the opening and closing of stations and in the transfer of the staff so as to avoid unnecessary expense and subject the clerks to as little loss and inconvenience as possible.

In the case of Meiktila Circle the Supervisor visits the stations in his charge every month, as trade with the Southern Shan States is carried on throughout the year. The Supervisors of Myitkyina, Bhamo, Mandalay and Thatôn Circles visit their stations only during the dry season. These visits have helped considerably in securing punctuality and accuracy in the submission of returns. The Deputy Director inspected stations in the Kyauksè District and the Settlement Commissioner inspected stations in the Myitkyina, Bhamo, Mandalay and Thatôn Districts. The Deputy Commissioners, Myitkyina, Bhamo, Ruby Mines, Mandalay, Kyauksè, Toungoo and Tavoy inspected the stations in their respective Districts.

Statement IV, pages 46 and 47.

7.—*Total value of the Inland Foreign Trade.*—The total value of the imports and exports in the past three years amounted to 1,687 lakhs, an increase of 228 lakhs on the total of the preceding triennium. The following table shows the growth of the trade :—

	In Lakhs of Rupees.				
—	1908-09.	1909-10.	1910-11.	Triennium, 1908-09 to 1910-11.	Triennium, 1905-06 to 1907-08.
Imports	256·26	299·14	323·20	878·60	729·59
Exports	259·70	267·80	281·37	808 88	729·74
Total ...	515·96	566·94	604·57	1687·50	1459·33

Note.—In this and all subsequent pages of the report the figures which represent the value of goods are shown in lakhs to two places of decimals.

In 1907-08 the imports amounted to 256·90 lakhs and the exports to 276·99, so that at the beginning of the triennium there was a slight set-back. But 1908-09 was marked by a virulent plague epidemic and also was a year of world-wide trade depression, so that a short check was inevitable, and in the two succeeding years the ground lost has more than been regained. For this the import trade is chiefly responsible; imports have grown to a much greater degree than exports. Of the total trade in the triennium silver accounts for one-quarter and timber for almost 8 per cent.

Among the imports the large production of lead in the Northern Shan States which began in the past three years, is most noticeable and accounts for half of the total increase. The other half was distributed over various heads. The number of ponies imported doubled and the value almost doubled. The number of elephants rose 67 per cent. and the value 154 per cent. Though the quantity of silk piece goods imported declined 26 per cent., the value of the total import rose 20 per cent. There was a large growth in the import of cigar wrappers (*thanat-pet*) and the trade in til, pickled tea, fruit and jadestone also grew. The import of orpiment, though slightly higher, was disappointing. Black tea increased in quantity 32 per cent. and in value 27 per cent. The increase in silver amounted to 10 per cent. Against these increases must be set large falls in stick lac and in timber. The import of the former decreased 39 per cent. in quantity and 66 per cent. in value, while though the quantity of teak imported rose 28 per cent., the value of the total import fell 9 per cent. Opium declined in quantity and value and there was also a fall in the value of hides though a larger quantity was imported. Statement I, page 25, columns 30 and 31.

Exports grew 11 per cent. For this the increase under European cotton piece goods was mainly responsible. The value of this export rose 68 per cent., but the quantity was only 17 per cent. higher. The quantity and value of the wet salt fish export rose 50 per cent. Other heads under which increases were recorded, were petroleum, other kinds of oils, apparel, brass, liquor, various kinds of provisions and betel nuts. On the other hand the export of silk piece goods decreased 27 per cent. in quantity and 15 per cent. in value. Woollen goods rose 4 per cent. in quantity, but the value fell 27 per cent. The export of silver declined 5 per cent. There was no advance in the export of European or Indian twist and yarn. The export of raw cotton diminished by 68 per cent. in quantity; the trade in this has been diverted from Bhamo to Rangoon. Statement II, page 41, columns 28 and 29.

In 1910-11 the total value of the inland foreign trade rose 6·63 per cent. All countries shared in the increase except Northern Siam and Karenni.

8. *Trade with Western China.*—The trade with this country during the triennial period under report increased by 2·13 per cent., but as the following table shows, the increase was not continuous nor was it divided between the exports and the imports.

	In Lakhs of Rupees.				
	1908-09.	1909-10.	1910-11.	Triennium, 1908-09 to 1910-11.	Triennium, 1905-06 to 1907-08.
Imports	34·02	30·57	38·41	103·01	111·82
Exports	47·19	45·25	51·39	143·84	129·85
Total ...	81·21	75·82	89·80	246·83	241·68

In 1907-08 the total trade amounted to 87·39 lakhs, so that the history of the triennium is a record of loss for two years and more than complete recovery in the third.

The rise in imports last year was most noticeable, yet the year's total was about a lakh lower than that of 1907-08, and it is to the growth of the exports that the net increase in the trade is due. Statement II, pages 26 and 27.

The articles which contributed to this increase in exports were cotton piece goods of European manufacture (18·72) jadestone (7·37), woollen piece goods (2·72), and wet salt fish (1·89). On the other hand raw cotton dropped in value 7·64 lakhs, Indian twist and yarn 4·16, dry fish 1·33 and silver 1·50. Imports were less under the heads of opium, hides and raw silk by 4·33, 2·96 and 1·26 lakhs, while silver declined 8·59 lakhs. These losses were to some extent counterbalanced by increased imports of animals (2·09), various kinds of provisions (2·02), grain and pulse (1·31) and miscellaneous manufactured merchandise (1·07). Statement I, pages 10 and 11.

The last three years have been a period of transition in Western China, and this is largely the explanation of the above figures. The cultivation of the poppy was restricted and the purchasing power of the people temporarily impaired, while a substitute for the opium crop was being found. That the people have been successful in this and are adapting themselves to the changed conditions, the trade revival in 1910-11 seems to indicate.

Apart from opium the largest decrease was in hides. The European firm which had established an agency at Bhamo closed it in 1908-09. The bad packing of the hides made the trade unprofitable. Since then another European firm has opened an agency.

The decrease in the import of raw silk is to be attributed to plague in Mandalay. The outbreak there and at Bhamo, and the exaggerated rumours to which it gave rise, hampered and diverted trade under all its heads.

Among exports the decrease in raw cotton and in Indian yarn and twist is outweighed by the increased rise under the head of European piece goods. The export of jade by land coincides with a decreased export by sea and the one fact may perhaps explain the other. Against the fall under dry fish must be set the rise in the export of wet salt fish.

The growth in the export trade is the more gratifying as goods from Burma have now to meet the competition of the Tongking railway to Yünnan, which reached Yünnan-fu last year. So far the railway has had no effect on the Burma trade as far as Tali-fu and three or four days' journey beyond it. In other words the trade by way of Burma is more than holding its own, for Têngyüeh and Yünnan-fu are each twelve days by pack animal from Tali-fu.

The growth of the export trade has been helped considerably by competition in Burma. A struggle for the Bhamo-Rangoon trade has arisen between the Burma River Transport Company and the Irrawaddy Flotilla Company and in consequence freights to and from Bhamo have been largely reduced.

Statements I and II, pages 10, 11, 26 and 27.

The increase of trade in 1910-11 amounted to 18·44 per cent. Imports rose 25·64 per cent. chiefly under raw silk (·75) and silver (5·66). Exports grew 13·58 per cent.; the chief increases were in Indian twist and yarn (5·31) and jadestone (3·25). There was a decrease under the head of provisions (other kinds), but this is apparent only and is owing to the classification of Birds' Nests under a separate head.

The construction of a light railway between Bhamo and Têngyüeh has been urged in previous reports and would do much to improve the trade of the Province. If this is not immediately feasible, a metalled cart road might be made to replace the present mule track. If Burma is to retain the hold which it has at present on the markets of Western China, the present unsatisfactory state of the trade route from Nampoung to Têngyüeh ought to be remedied as early as practicable. Geographically Rangoon is more favourably situated than Hai-fong and given an easy means of transport, goods from England could be delivered in Têngyüeh within seven or eight days of their arrival in Rangoon, while the English mails from London would reach Têngyüeh in twenty-three days.

9. *Trade with the Northern Shan States and the Kachin Country.*—The total trade between Burma and these States has risen largely during the past three years. But the growth has been confined to imports and the export trade has hung fire; in no one of the three years was the value of the exports so high as in 1907-08.

	In Lakhs of Rupees.				
	1908-09.	1909-10.	1910-11.	Triennium, 1908-09 to 1910-11.	Triennium, 1905-06 to 1907-08.
Imports	97·48	122·25	131·41	351·15	214·60
Exports	86·55	78·77	77·52	242·84	202·86
Total ...	184·03	201·02	208·93	593·99	417·46

The record of this trade is therefore the converse of that with Western China; in the latter imports fell and exports rose, whereas here imports have advanced and exports have remained stationary. The two facts may not be unconnected, for much of the Northern Shan States trade is a transport trade and goods consigned to these States ultimately find their way to China; for example the Superintendent of the States thinks it probable that out of every ten

bales of yarn which enter the States, nine pass through to China. It is therefore to the conditions prevailing in Yünnan that the check in the export trade must partly be assigned; another cause has been the poor harvests of 1908-09 and 1909-10 in the Northern Shan States. In 1910-11 there was a bumper crop, but there has not yet been time for this to exercise its full effect on trade.

In the import trade the chief increases were under ponies (2·75 lakhs), other kinds of animals, chiefly pigs and poultry (1·88), oranges (1·55), husked rice (6·75), lead (75·54), pickled tea (6·49), til (2·60), jadestone (2·53), black tea (4·96), teak (11·83) and silver (10·68). Lead appears in the triennial statement for the first time and the figures represent the output of the Bawdwin mine; the Company have completed their railway and the mine is now in working order. The increase under jadestone is apparent only; for a time, owing to similarity of village names, jadestone which came from British Kachin country was wrongly registered as coming from unadministered territory. Statement I, pages 12-15.

The most noticeable decreases were in the imports of spices (1·09), various kinds of timber (·98), precious stones (1·37) and stick lac (2·78). The fall under the head of unmanufactured articles amounts to 7·79 lakhs, but the figures are deceptive, for cigar wrappers (*thanatpet*) have now been excluded from this head and are classified separately.

Exports advanced forty lakhs, chiefly under the heads of cattle (1·03), apparel (1·04), Indian twist and yarn (1·16), European piece goods (25·14), brass (1·14), petroleum (1·65), other kinds of oil (1·80), wet fish and *ngapi* (7·12), various kinds of provisions (2·75), salt (1·03), betel nuts (1·04) and silver (13·85). The main decreases were in railway materials and iron; exports under these heads were inflated during the preceding triennium by the large quantities used by the mining company in making its railway. There was also a large fall in the export of European twist and yarn; the European commodity is said to be too fine and is less popular than that of Indian manufacture. Statement II, pages 28—31.

Trade during 1910-11 advanced 3·93 per cent. Imports rose 7·5 lakhs and are solely responsible for the increase. Lead, black tea and teak all rose, but husked rice and pickled tea declined in value. The fall in exports amounted to one and a quarter lakhs and was shared in by most articles except European piece goods which rose by 1·81 lakhs.

10. *Trade with the Southern Shan States.*—Though the trade with the Southern Shan States in 1908-09 fell below that of the preceding year, yet within the triennium there has been steady and continuous growth as the following table shows:—

	In Lakhs of Rupees.				
	1908-09.	1909-10.	1910-11.	Triennium, 1908-09 to 1910-11.	Triennium, 1905-06 to 1907-08.
Imports	62·44	72·16	83·75	218·37	203·93
Exports	84·04	93·14	101·43	278·63	259·69
Total ...	146·48	165·30	185·18	497·00	463·62

The chief items of increase in the import trade were ponies (4·26), elephants (7·07), cattle (2·90), various kinds of animals (1·09), paints (2·61), cigar wrappers (27·57) and silver (9·15). The rise under the head of elephants is not a sign of good trade. It is due to the exhaustion of some of the teak forests in the Salween drainage area which has led timber traders to sell their elephants. The figures for cigar wrappers are deceptive; the real increase has probably been about seven lakhs; a separate head was opened for this article in the triennium. Statement I, pages 16—19.

The most noticeable decrease occurred in stick lac and amounted to 20·64 lakhs; the decline in the lac trade which began in 1907-08, has not yet ended. There was a slight contraction in silk piece goods (1·63). Exports rose 7·29 per cent. Increases over a lakh were recorded in liquor (1·5), various kinds of oil (1·89), ghi (1·17) and Indian twist (1·11), while apparel rose by 2·04 lakhs. But by far the largest increase was in European cotton piece goods; the export of these grew from 70·40 to 113·47 lakhs. Jewellery fell 1·97 lakhs, silk piece goods 3·02 lakhs, woollen piece goods 5·30 lakhs and miscellaneous manufactured merchandise 1·02 lakhs. The decrease in silver was 17·73 lakhs and may have been due to a larger use of supply bills. Statement II, pages 32—35.

The trade of 1910-11 was the largest on record. Imports advanced 16·06 per cent. and exports 8·9 per cent. Cattle (2·16), elephants (5·51), cigar wrappers (3·89) and silver (2·06) account for the growth in the imports and more than

counterbalance a fall of three lakhs in teak. Among exports, piece goods advanced 6·67 lakhs and silver 6·12, while the only noticeable decline was in Indian twist and yarn (1·53).

During the triennium the construction of a railway to the Shan States was begun.

11. *Trade with Northern Siam.*—The trade with this country during the triennial period under review has fluctuated largely: in the result there has been an increase in the total trade of almost 9 per cent. The figures of year's trade and of the triennium are summarized below.

	In Lakhs of Rupees.				
	1908-09.	1909-10.	1910-11.	Triennium, 1908-09 to 1910-11.	Triennium, 1905-06 to 1907-08.
Imports	33·46	39·25	33·10	105·83	102·78
Exports	26·03	31·23	30·81	88·08	75·17
Total ...	59·49	70·48	63·91	193·91	177·95

Statement I, pages 20 and 21. Statement II, pages 36 and 37.

An increase of 7·81 lakhs under silver is entirely responsible for the rise in the import trade; there were large decreases in cattle (1·82), elephants (2·52) and teak (1·85). In exports the advance was general. The chief increases were in European twist and yarn (4·33), European piece goods (2·85) and gold (1·00), but the export of Indian twist and yarn fell a lakh as did that of elephants.

Reasons for the fluctuations and for the impaired expansion of the trade are to be found in the decline in the value of teak which occurred during the triennium, in the extension of the Siamese railway system and in the growth of river traffic with Bankok.

The year 1910-11 was unfavourable and imports declined 15 per cent. and exports 1 per cent. In imports the principal losses were in elephants and teak while the decline in exports was general with the exception of silver which advanced 1·72 lakhs. In addition to the causes enumerated above an outbreak of cholera on the border contributed to the depression.

Statement I, page 20, columns 2 and 3.

12. *Trade with Raheng.*—The Raheng trade, though a part of the trade with Northern Siam has been prosperous during the past three years, and the depression of the preceding triennium has disappeared. In 1908-09 the value of the trade was 4·89 lakhs, in 1909-10 it rose to 6·28 lakhs and last year to 7·24 lakhs. The import trade in cattle and unhusked rice and the export trade in European cotton piece goods, in woollens and in precious stones has been brisk, and the making of a railway in place of the present imperfect means of communication would undoubtedly lead to a great development.

Statement II, page 36, columns 2 and 3.

13. *Trade with Southern Siam.*—The figures of the trade year by year with Southern Siam which are set out below, show that the growth within the past three years has not been large or continuous, and it seems probable that the extension of the Siamese railways is affecting the old trade routes.

	In Lakhs of Rupees.				
	1908-09.	1909-10.	1910-11.	Triennium, 1908-09 to 1910-11.	Triennium, 1905-06 to 1907-08.
Imports	10·07	8·52	10·59	29·19	21·46
Exports	7·08	7·66	8·26	23·02	19·80
Total ...	17·15	16·18	18·85	52·21	41·26

Statement I, pages 22 and 24. Statement II, page 38 and 40.

The two staples of the import trade are cattle and silk piece goods. But in the last three years a trade in precious stones has sprung up which now amounts to 1·24 lakhs and bids fair to become important. The import of silver rose 1·06 lakhs, the export 2·80. More iron goods also were exported, but the export trade in general was flat. Cotton piece goods fell a quarter of a lakh and the export of yarn made no advance.

In 1910-11 trade recovered from the depression of the preceding year. Imports rose over 24 per cent. and exports almost 8 per cent. The most remarkable advance, amounting to 3·95 lakhs, was under the head of silk piece goods; this is ascribed to the popularity in Burma of the silk called *polein*, the durability and fine gloss of which ensures a ready market.

14. *Trade with Karenni.*—The trade with this country declined during the past three years. The imports fell 5 per cent. and the exports, which had doubled in the preceding triennium, fell 23 per cent.

As the table shows, 1908-09 was the worst year:—

	In Lakhs of Rupees.				
	1908-09.	1909-10.	1910-11.	Triennium, 1908-09 to 1910-11.	Triennium, 1905-06 to 1907-08.
Imports	18·75	26·37	25·90	71·04	74·97
Exports	8·80	11·72	11·93	32·46	42·35
Total ...	27·55	38·09	37·83	103·50	117·32

A heavy decrease, 19·54 lakhs was recorded in the import of teak, and this outweighed the increased importation of ponies (1·30), elephants (9·39), and silver (3·76). In the exports the heads of decrease are elephants (4·19), jewellery (1·09) and silver (6·71). The only export which advanced more than a lakh in value was betel-nut. Statement I, pages 23 and 25. Statement II, pages 39 and 41.

It is doubtful how far the figures can properly be compared with those of past years. New offices have been opened in the Toungoo district and the registration of imports other than timber has been improved.

The trade with Karenni is mainly an import trade. Exports of merchandise are small; for example the value of the European cotton piece goods exported in the past three years was less than a lakh. Silver constitutes 71 per cent. of the exports. The import trade is dependent on the teak market, and it is to the depressed condition of that market, to the exhaustion of some of the teak forests and the inferior quality of the teak imported that the withdrawal of elephants and the contraction in the timber imports are attributable.

The trade of 1910-11 exhibited the tendencies described above. Ninety elephants were imported as against 80 in 1909-10, and the quantity of teak imported fell and its value declined 2·05 lakhs. There was a revival in the export of general merchandise while that of silver remained stationary.

15. *Import of Tobacco overland.*—It may be of interest to review briefly the overland trade in this article. Tobacco is exported in leaf to Western China, the Shan States, Karenni and Siam. A little of it is there crudely cured and prepared to suit the taste of the Shans, Karens and Siamese and then is re-imported. The figures below show the extent of this trade. The tobacco which is thus imported overland, is not an English, Egyptian or American brand.

	Re-imports. Mds.	Exports. Mds.

1909—10	495	11,394
1910—11	621	13,041

CHAPTER II.

Imposts in the shape of Taxes or Tolls levied on Transfrontier Trade.— It is highly satisfactory to record that from information collected from District Frontier Officers, brokers and traders, no taxes or tolls are levied on goods entering or quitting this Province at points on the trade routes just beyond our borders, except in the case of Siam. In Siam a poll-tax of four ticals has been levied for some time on all persons entering that country from the Shan States, and this has discouraged trade. But it has now been arranged that in future visitors to Siam from Burma will be exempted from payment of this poll-tax provided they hold passports dated not more than six months before the time at which exemption is claimed. The peaceful state of the borders has helped considerably in the development of the trade of the Province and the proof is the substantial increase shown every year in the statistics of the Transfrontier Trade of Burma. Certain imposts reported by district officers to be levied on goods in China and Shan-Chinese countries at recognized Likin stations are given in Statement V of the Appendices. Statement V, page 48.

A memo. of tariff charges was kindly prepared by Mr. Archibald Rose, His Britannic Majesty's Acting Consul at Têngyüeh for the information of the merchants interested in the trade of China, copies of which were issued to some of the leading firms in Rangoon and Bhamo and are available on application at the Government Book Depôt.

A. GAITSKELL,
Offg. Commissioner of Settlements and Land Records, Burma.

RANGOON, *19th July 1911.*

NOTE
ON THE
TRANSFRONTIER TRADE OF BURMA
for the year 1911-12.

1. *Total trade.*—The total value of the trade registered during 1911-12 amounted to Rs. 6,47,80,915, the imports being 326 lakhs in value and the exports 321. This is 43 lakhs or 7 per cent. more than in 1910-11. Merchandise, timber and silver represented approximately 70,5 and 25 per cent. of the aggregate trade. The excess of imports over exports was 5 lakhs only as compared with 42 lakhs in the preceding year, and for the second time on record the exports of treasure slightly exceeded the imports. The marketing of a bumper harvest in the Northern Shan States and the absence of cattle disease in the Southern States and in Siam, were the chief features of the year. The aggregate trade with all countries except Western China grew considerably, the increases ranging from 6 to 16 per cent. Stat. I, page 19 and Stat. II, page 35.

2. *Western China.*—The value of the trade with Western China was 77 lakhs, 14 per cent. less than in 1910-11. The Tonkin-Yünnanfu railway, a boycott of British trade in Yünnanfu, the collapse of the bridge over the Salween on the main road from Têngyüeh to Talifu, the uncertain state of markets throughout Yünnan while the revolution was in progress, and the heightened pitch of freights on the Irrawaddy towards the end of the year after the cessation of competition, account for the large decline. The export of Indian yarn fell 17,000 maunds and that of jade ceased altogether for a time, while the import of treasure was 4 lakhs less than in 1910-11. But after the establishment of the Chinese republic a brisk recovery set in. Stat. I, pages 4 & 5 and Stat. II, pages 20 & 21.

3. *The Northern Shan States.*—Imports from the Northern Shan States declined by almost 8 lakhs, but exports increased 37 lakhs in value, the gross trade amounting to 238 lakhs. The removal by the Burma Mines Company of their smelting works from Mandalay to Namtu, involving as it did the cessation of the import of lead ore, depressed the import and inflated the export figures to the extent of 14 and 11½ lakhs respectively. There was a fall of 5 lakhs under the head of teak, but the bumper rice harvest of 1910-11 which was sold at high prices in Burma, fetched 7 lakhs more than in the preceding year and black tea over 3 lakhs more, and as a result there was a brisk export trade in oil, fish, yarn and piece goods while in addition 4½ lakhs more of silver than in the preceding year were taken out of Burma. Much of the export trade, especially in yarn, is a transport trade with Yünnan, and this was stimulated by the fall in the value of the rupee, 42 taels being the equivalent of Rs. 100 as against 48 in 1910-11. Stat. I, pages 6—9 and Stat. II, pages 22—25.

4. *The Southern Shan States.*—The trade with the Southern Shan States aggregated 196 lakhs, the imports being 8 lakhs and the exports 3 lakhs more than in the preceding year. The rise in the import figures is accounted for by increased sales of cattle and by the withdrawal of elephants as the result of restricted timber operations. An increase of 1,000 maunds in the value of raw cotton is worthy of notice although the total import is very small. The export of silver rose 2¾ lakhs which probably represents payment for the cattle. So far as the returns show, little railway material has yet been taken across the border though the railhead had reached the seventeenth mile at the close of the year. Stat. I, pages 10—13, and Stat. II, pages 26—29.

5. *Northern Siam.*—The total trade with Northern Siam was valued at 69½ lakhs, a rise of almost 9 per cent., mostly under exports and accounted for by the recovery in the cattle trade. Stat. I, pages 14 & 15 and Stat. II, pages 30 & 31.

6. *Southern Siam.*—The gross trade amounted to 22 lakhs, 3 lakhs more than in 1910-11. Imports and exports contributed equally to the increase. Silk goods were imported on much the same scale, but owing to a change in fashion their value was less. The expansion of the trade in cattle however more than counterbalanced the decline. The growth in the exports is solely confined to the head of treasure. Stat. I, pages 16—19 and Stat. II, pages 32—35.

7. *Karenni.*—The trade aggregated 44 lakhs. The imports were a lakh and the exports 5 lakhs more than in 1910-11. The decline in the teak imported and the increase under the head of elephants are accounted for by the growing exhaustion of the forests. The number of cattle brought down for sale rose considerably. The increase in exports was mainly in treasure. Stat. I, pages 16—19 and Stat. II, pages 32—35.

8. *Imposts.*—The Chefang *Sawbwa* and the Mangshih *Sawbwa* are reported to have levied irregular tolls on trade, and it is believed that imports above tariff rates were levied at Lungling, Ssumao and Konglaw by the local Chinese authorities.

H. M. S. MATHEWS,
Commissioner of Settlements and Land Records.

RANGOON, *12th July* 1912.

NOTE

ON THE

TRANSFRONTIER TRADE OF BURMA

For the year 1914-15.

1. *Total Trade.*—The following table shows country by country the value of the import and export trade of the Province during the year under report as compared with that of the preceding year :—

Year.	1913-14.	1914-15.	Percentage of increase or decrease.
	Rs.	Rs.	Rs.
Western China—			
Import	60,96,137	73,10,552	+20
Export	66,82,698	57,71,064	−14
Total ...	1,27,78,835	1,30,81,616	+ 2
Unadministered Kachin Country—			
Import	3,79,349	6,32,419	+67
Export	5,93,999	8,02,433	+35
Total ...	9,73,348	14,34,852	+47
Northern Shan States—			
Import	1,35,62,586	1,45,86,615	+ 8
Export	1,24,75,104	1,51,40,066	+21
Total ...	2,60,37,690	2,97,26,681	+14
Southern Shan States—			
Import	1,00,63,153	77,80,411	−23
Export	99,53,392	1,05,06,473	+ 5
Total ...	2,00,16,545	1,82,86,884	− 9
Northern Siam—			
Import	43,26,063	39,64,049	− 8
Export	34,02,287	31,31,641	− 8
Total ...	77,28,350	70,95,690	− 8
Southern Siam—			
Import	14,03,951	20,40,580	+45
Export	9,08,049	12,52,376	+38
Total ..	23,12,000	32,92,956	+42
Karenni—			
Import	39,84,501	27,41,280	−31
Export	16,88,570	11,01,256	−35
Total ...	56,73,071	38,42,536	−32
Aggregates—			
Import	3,98,15,740	3,90,55,906	− 2
Export	3,57,04,099	3,77,05,309	+ 6
Total ...	7,55,19,839	7,67,61,215	+ 2

The distribution of this trade under merchandise, treasure and timber gives the following percentages: 72, 24 and 4. It is satisfactory that the aggregate trade for the year should show an increase of 12·41 lakhs, despite the economic crisis and dislocation caused by the upheaval in Europe. Great variations have resulted in certain commodities, but on the whole merchants and traders have adapted themselves readily to the changed conditions.

2. *Western China.*—Bhamo is the chief centre of transfrontier trade for Western China. The total value of the trade during the year shows a decrease in exports of 13·6 per cent., but an increase of 19·9 per cent. in imports. The decrease in exports was mainly under the heads of cotton twist and yarns (Rs. 1·51 lakhs), and piece-goods (Rs. 7·67 lakhs). The decreases under these heads were to some extent counterbalanced by an increase in the export of raw cotton. The increase in imports was mainly under the head of silver (Rs. 21·70 lakhs). On the other hand there was a decrease in imports of raw silk (Rs. 2·69 lakhs). Lack of tonnage and increase of freights caused a rise in the price of foreign goods, while financial troubles in the Chinese bazaar and the result of over-trading in previous years assisted in the decline. On the other hand the low price of Burma cotton, due to the disorganization of the world's cotton market, led to a large increase in the export of this commodity for the Chinese market. Credit and loans were greatly restricted and the balance of trade and old debts liquidated owing to the war had to be paid in cash with a resulting increase in the import of silver. The decline in the import of raw silk was largely due to over-stocking in previous year.

3. *Unadministered Kachin Country.*—Neither the war nor the Kachin frontier trouble appears to have affected the trade with this area: imports show a rise of 67 per cent. and exports a rise of 35 per cent. The opening up of the new Putao District has naturally resulted in "trade following the flag." Part of the increase must however be attributed to better registration, as a new office was opened at Mogaung in November 1913.

4. *Northern Shan States.*—The value of imports and exports here show an increase, which is however almost entirely due to the activity of the Burma Mines Company. Lead shows an increase of 12·75 lakhs on the totals of 1913-14, and it is interesting to note that for the first time some 11,295 maunds of copper valued at Rs. 3·88 lakhs were shipped to Liverpool. The enhanced export figures in coal and coke (2·27 lakhs) and iron (23·58 lakhs) are chiefly due to the requirements of the company. One of the principal products of the Northern Shan States is oranges, and some 1·74 lakhs more were imported this year than last. This is due to more gardens coming into bearing. The tea trade was not so flourishing; prices were poor, and producers held up their stocks. Pickled tea is a luxury, chiefly marketed in Mandalay, and doubtless the comparatively poor agricultural year has resulted in economies in consumption of this article throughout Burma. European twist and yarn showed a revival, and the exports increased by Rs. 3·13 lakhs. European piece-goods showed a decline of 3·35 lakhs. Cheap German and Austrian goods are still in stock in certain markets, but the Superintendent, Northern Shan States, reports that Japanese goods have displaced German articles in the important bazaar of Namkham.

5. *Southern Shan States.*—Imports from the Southern Shan States show a decrease of Rs. 22·82 lakhs mainly under the heads of cattle, teak, elephants and silver. The decrease under the head of cattle (Rs. 8·23 lakhs) was mainly due to the fact that the market for cattle in Burma was disorganized by the poor crops and low prices which affected the purchasing power of the agriculturist. Exports of European cotton piece-goods showed a decrease (Rs. 4·24 lakhs), which was however counterbalanced by a revival of trade in manufactured piece-goods, both silk (Rs. 2·49 lakhs) and woollen (Rs. 3·32 lakhs). The opening of the railway as far as Aungban (Kalaw) has stimulated trade in potatoes, oranges and *thanatpet*, but prices ruled very low, and though the quantity imported was greater than last year the value was less. The influence of the railhead at Aungban has not yet made itself felt on all the trade routes, but this is only a matter of time. In the Myelat area it is of great importance already.

6. *Northern Siam.*—Here also the poor market for cattle in Burma caused a decrease of 5·76 lakhs, and owing to scarcity of money the import of silk piece-goods also declined. A slight increase of activity amongst European firms led to an increase in the import of elephants. There was an advance in the value of Indian twists and yarns exported.

7. *Southern Siam.*—Elephants and cattle which are imported from this area both showed an increase. Siam is at present the main source of supply of elephants for timber extraction in this province. There was a decrease in the importation of silk piece-goods.

8. *Karenni.*—This area appears to have felt the stagnation of trade very considerably and imports and exports show decreases of 31 and 35 per cent. respectively. The decrease took place mainly in the value of teak imported into Burma (Rs. 8·93 lakhs). The timber contractors had in consequence less silver to receive and the export of silver from Burma shows a decrease of 3·77 lakhs.

9. *Imposts.*—Besides the information already recorded in former reports, it appears that from the 1st January 1915 traders of all nationalities entering the Laos Province of French Indo-China are taxed. The tax is a personal one, and is said to amount to ·60 per cent. of the declared value of their goods: this is considered by the Superintendent, Southern Shan States, as very reasonable. From the same date the tax on buffaloes, oxen and pigs exported from French territory has been abolished, but the charge of *Piastres* 250 on each elephant exported is still maintained. Certain ferry charges are collected at Könglap on the Mekong, the proceeds are credited to the budget of Mong Hsing State, and may be considered as charges for services rendered.

R. E. V. ARBUTHNOT,
Offg. Commissioner of Settlements and
Land Records, Burma.

RANGOON, *21st July* 1915.

The value of the trade in merchandise, treasure and timber represents respectively 75, 22 and 3 per cent. of the total trade of the province. Unlike the preceding year there was a considerable decline in the trade with all the frontier states except Western China and the Northern Shan States, and the aggregate trade of the province consequently fell by 21 lakhs or 2·77 per cent. In view however, of the unfavourable economic conditions which prevailed throughout the year, it is satisfactory that the volume of trade did not show a greater decline.

2. *Western China.*—The trade with Bhamo, the chief trading centre with this transfrontier country, constitutes a record amounting to Rs. 135·51 lakhs or an increase of 3·58 per cent. as compared with the value of the trade in the preceding year. A larger expansion would have resulted but the uncertain political outlook in Yünnan caused a contraction in the trade during the last quarter of the period. The commandeering of mules by the Military authorities at Têngyüeh for the transport of troops to Yünnan-fu caused a lack of transport facilities and the corresponding increase in freight rates militated against normal trade during that period. The import trade shows an expansion of Rs. 15·22 lakhs or 20·82 per cent., the increase being mainly due to larger imports of silver the value of which rose from 53·75 to 69·05 lakhs. It is said that purchases of silk in Ssūchuan was paid for by exporting treasure to Burma whence remittances to Ssūchuan were made by drafts on foreign banks in Hongkong and Shanghai. The heavy rise in the price of silver at the end of 1915 was possibly another cause for the inflated value of the silver imports, and this probably stimulated Chinese merchants in Burma to import a larger quantity of raw silk from Ssūchuan, the value exceeding that of the preceding year by Rs. 88,075. The trade in hides fell by Rs. 47,456 probably owing to the closure of European markets and also to lack of tonnage. This fall was, however, in a measure counteracted by a rise of Rs. 44,106 in the value of orpiment imported, owing no doubt to the cessation of competition due to the difficulty in getting foreign dyes and paints from Europe. The value of exports on the other hand shows a heavy fall of 10·51 lakhs or 18·22 per cent., raw cotton accounting for a decrease of Rs. 3·86 lakhs and Indian twist and yarn of Rs. 4·22 lakhs. The decline was apparently due to the heavy exports in the last quarter of the preceding year which led to over-stocking of markets. The difficulty in obtaining aniline dyes is also another cause. The trade in cotton piece-goods also shows a decrease of Rs. 1·47 lakhs owing to restricted imports from Europe as a result of the war.

3. *Unadministered Kachin Country.*—The trade with this country declined both in imports and exports as compared with the preceding year, but the value of trade carried on during that year was abnormally high.

4. *Northern Shan States.*—The imports from these States increased by Rs. 19·85 lakhs or 13·60 per cent. and the exports by Rs. 15·28 lakhs or 10·09 per cent. In both cases the increase is chiefly in the rail-borne trade due to the rapid development of their property by the Burma Mines Company at Namtu. The value of copper and lead imported from the mines rose by Rs. 2·80 and Rs. 11·82 lakhs respectively. There is also an increase in the value of iron (Rs. 3·35 lakhs) and railway materials (Rs. 5·01 lakhs) returned to Burma. On the other hand a falling off of Rs. 5·88 lakhs occurs under other metals as shipments of ore to Europe for smelting have practically ceased. Of indigenous products of the States, apart from metals, potatoes, gums, lac, sessamum, spices, black tea, and teak show an increase. Husked rice, hides and pickled tea, however, decreased in value. As regards exports the largest increase is under coal and coke for the use of the Burma Mines Company, which rose from Rs. 3·34 to Rs. 10·94 lakhs. The trade in twist and yarn, the principal through trade with China, was stagnant and Indian twist declined by Rs. 92,681. The increase in cotton piece-goods was in the Kēngtūng trade. The value of husked rice and iron exported expanded by Rs. 2·53 and Rs. 4·60 lakhs respectively. An increase under silk is noticed yearly as the standard of living rises. But the trade of the States, apart from that caused by the Burma Mines, suffered from the rise in prices caused by the war. German and Austrian cloth was still selling at Namkham, but Japanese miscellaneous articles are gradually replacing those of German and Austrian make in the local bazaars.

5. *The Southern Shan States.*—Unlike the Northern Shan States the value of both import and export trade declined by Rs. 2·85 and Rs. 12·51 lakhs respectively. The unfavourable trade conditions occasioned by the war no doubt accounts for this. The principal fall is in the cattle trade which records a decrease of Rs. 10·77 lakhs; this is attributed to a check in the purchasing power of agriculturists. The trade in raw hides declined by about half a lakh in value partly as the result of the internment of aliens who largely managed this trade. On the other hand owing to the curing of leather in the States the imports of manufactured leather therefrom increased by Rs. 3·36 lakhs. The over-production of potatoes in the preceding year and the low prices obtained for the crop resulted in restricted cultivation. Nevertheless there is a small increase in the value of potatoes exported to Burma. The restricted imports of potatoes from India during the year owing to the shortage of tonnage and high freight rates, it is said, combined to make the local crop more valuable. The value of *Thanatpet* advanced by Rs. 4·15 lakhs; the increase is attributed to a larger demand for cigar wrappers and to fair prices being obtained for the crop: much of the increase was in the rail trade. In exports to the States, the principal decline was in cotton, silk and woollen piece-goods which fell respectively by Rs. 3·42, Rs. 6·19 and Rs. 3·20 lakhs in value. The change in economic well-being explains these decreases. The only noticeable increase in exports is under iron and railway materials due to completion of the construction of the Southern Shan States railway. As a result of the heavy decrease in the import of cattle the export of silver to these States fell by Rs. 7·41 lakhs. This is the first full year of rail trade since the opening of the Thazi-Aungban Railway line and it is interesting to note that of the total trade of Rs. 167·49 lakhs, the railway accounted for 93·94 lakhs or 56 per cent. The railway has drawn away much of the trade formerly carried on by the routes near the line.

6. *Northern Siam.*—The effects of the war are in striking evidence here exhibiting a decrease in almost all commodities of imports, the heaviest being in cattle (Rs. 6 lakhs) and teak (Rs. 5 lakhs), but the value of elephants advanced by about half a lakh. In exports the principal decreases are under cotton twist and yarn, piece-goods and silver. But a slight advance is noticeable in raw silk and manufactured leather. The decrease in exports is also partly due to the improved railway and other communications in Siam which now enable some of the frontier Siamese districts obtaining their supplies through Bangkôk instead of through Moulmein.

7. *Southern Siam.*—The value of both imports and exports are less respectively by 31 and 48 per cent. Cattle, imported, declined by Rs. 3 lakhs and elephants by about Rs. 1½ lakhs probably due to the general financial stress on account of the war; and consequently silver in cash, mainly exported for the purchase of cattle and elephants, declined by Rs. 5·52 lakhs.

8. *Karenni.*—Here also the import trade in cattle and teak and the export of silver dropped. It is interesting to note that the value of wolfram imported from these States during the year rose from Rs. 1·68 lakhs in 1914-15 to Rs. 3·54 lakhs.

9. *Imposts.*—During the year new ferry tolls on certain pack and transport animals were levied by Siamese ferry licensees.

D. F. CHALMERS,
Offg. Commissioner of Settlements and Land Records, Burma.

RANGOON, *20th July* 1916.

REPORT

ON THE

TRANSFRONTIER TRADE OF BURMA

AND THE ADJOINING FOREIGN COUNTRIES

DURING THE YEAR 1916-17 AND THE TRIENNIAL PERIOD ENDING 31st MARCH 1917.

CHAPTER I.

1. *Form of Report.*—This is the tenth triennial report issued in this province and is a review of the trade between Burma and the adjoining foreign countries, and Burma and the Shan States and Karenni.

The trade with the Shan States and Karenni part of which part is through trade with China and Siam is at present all treated as foreign trade. Remoteness and difficulty of supervision have hitherto stood in the way of establishing Trade Registration stations on the eastern borders of the Shan States and Karenni, but it is hoped to devise a scheme whereby true foreign trade can be registered on the most important routes.

2. *Re-organisation of the Trade Registration Department.*—During the period under review some changes in the Registration stations and establishments were effected in the Thatôn, Ruby Mines, Meiktila, Yamèthin, Kyauksè and Bhamo districts. The Supervisor, Thatôn Circle, who formerly carried out the inspection of the offices under his charge for six months in the dry season and spent the remaining six months during the rains at his headquarters station, Pa-an, has now been put in charge of the office at Pa-an during the rains, the appointment of a permanent Trade clerk at Pa-an has been abolished and instead a seasonal clerk for six months during the touring season of the Supervisor has been appointed.

In the Thatôn district some changes in the stations were found necessary. The main trade route Shan-gat-tê in Siam, after crossing the boundary, divides at Shanywathit—a village of some importance about 17 miles from the frontier—into two routes to Yinbaing and Kwanbi, where there were Trade Registration stations; some of the trade that came along the Kwanbi route however found its way to Shwegun, a village on the Salween, without passing through Kwanbi, and thus escaped registration. The stations at Kwanbi and Yinbaing were therefore abolished and a new one opened at Shanywathit.

A thorough revision of the offices in the Ruby Mines district was carried out during the triennial period. Under the system of registration in force trade with the Shan States is considered as transfrontier trade and is registered as such along the western frontier of the States. The location of posts in the Ruby Mines district was not in accordance with this principle, as offices at Shwedaunggôn, Molo, and Maugon had been established in the middle of the Möngmit State far from the Burma border. It was also known that an appreciable volume of trade between Mogôk and the Möngmit State *viâ* Bernardmyo and Kyetnapa was not registered. The stations at Shwedaunggôn and Molo were therefore closed and two new stations at Bernardmyo and Kyetnapa were opened; the station at Maugon was at the same time moved to Nga-O on the Shweli nearer to the western border of the State.

Most of the Southern Shan States trade formerly registered at Thazi and Pyawbwè in the Meiktila and Yamèthin districts and at Kalaw has been rail borne since the opening of the railway. The work at these offices was therefore greatly reduced and it has been found possible to close the station at Thazi and to reduce the establishments at Pyawbwè and Kalaw by one clerk each.

In the Kyauksè district the trade of the Natteik pass used to be recorded at Ingôn for six months during the dry weather, and owing to the reputed unhealthiness of Ingôn at Langwa for the remaining six months in the rains. Recent enquiries have shown that Ingôn is no longer so unhealthy as it was said to be and also that some trade which comes only as far as the Ingôn bazaar was lost to

registration for the six months when the office was at Langwa. The office at Ingôn has therefore now been made permanent and the Langwa station abolished.

In the Bhamo district the seasonal station at Sikaw was formerly opened for only five months in the year, from December to April; as it was found that much traffic passes through this station in November and May, the open season has been extended from five to seven months in the year.

3. *Cost of Establishment.*—During the year 1916-17 the cost of establishment at headquarters was Rs. 14,096 and that at outstations Rs. 22,699. During the triennial period now reviewed the average yearly cost was Rs. 13,724 at headquarters and Rs. 23,918 at out-stations against Rs. 13,692 and Rs. 21,801 at headquarters and out-stations respectively in the previous triennium. The increase of expenditure at out-stations of 9·71 per cent. over the figures of the previous triennial period was due to revision of establishments in some districts, and also to the grant of language allowances to clerks who have qualified in the frontier languages during the period.

4. *System of Registration.*—There has been no change in the system of registration of traffic and tabulation of statistics except that wolfram, which used to be classified as "metals, other sorts" under the head "metals and manufactures of metals" has been separately shown; large imports by the Papun route justified a separate classification.

5. *Inspection.*—Mr. A. C. Bhattacharjee, Superintendent of Trade Registration Offices, who succeeded Mr. P. L. Desantos early in April 1914 when the latter retired on invalid pension, has each year inspected all the important offices. During his tours enquiries were made regarding trade routes and movements of trade and proposals were made in consultation with the local officials which resulted in the revision of stations and establishments as described in paragraph 2.

The offices in the Kyauksè, Yamèthin, Thatôn, and Amherst districts have been inspected by the Deputy Commissioners, and the Subdivisional officers, Myitkyina, Bhamo, Mogôk, Toungoo, Pa-an, and Kawkareik have inspected the offices in their charges during the triennium. The Deputy Director of Land Records, Burma, also visited some offices in the Thatôn and Meiktila districts and the Southern Shan States.

6. *Total value of external land trade.*—The aggregate value of trade during the three-year period, as shown in the table below, was 2,462 lakhs, an increase of 316 lakhs or nearly 15 per cent. over the previous period:—

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports	390·55	396·32	454·65	1,241·53	1,091·28
Exports	377·05	349·99	493·48	1,220·53	1,054·37
Total ...	767·61	746·31	948·14	2,462·06	2,145·66

Except for the first four months the triennium has fallen in the war years and war conditions have naturally been reflected in trade movements.

In the first year imports declined while exports rose: in the second year, on the other hand, imports rose almost up to while exports fell below the 1913-14 level; in the last year the great growth in the material supplied to and the output from the Burma Mines in the Northern Shan States was the main factor in the great advance.

For the three years, the main increases were 12 lakhs in brass and copper, 55 lakhs in lead, 36 lakhs in other metals, 8 lakhs in raw silk and 77 lakhs in silver.

Remittances from Rangoon by drafts on Chinese banks are made to pay for some of these purchases.

In the articles of more general trade, imports of ponies declined by 16, cattle by 42, silk goods by 11, and teak by 27 lakhs.

Among exports, cotton piece-goods, twist and yarn, and other manufactured articles, fell in value. Fluctuations in prices have been accompanied by a fall in demand and a tendency to buy lower grade materials.

For the year 1916-17, general trade values advanced by 202 lakhs or 27 per cent. over 1915-16. Apart, however, from the growth in the output of metals and the rise in prices, there is no indication of any general development.

7. *Trade with Western China.*—The trade with Western China is practically the trade of Yünnan with Burma between the main centres of Têngyüeh and Bhamo. Its value for the last three years and for the previous triennial period is shown in the following table :—

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports	73·10	88·32	102·49	263·92	154·13
Exports	57·71	47·19	55·17	160·08	178·88
Total ...	130·81	135·51	157·67	424·00	333·01

Although the value of the trade is greater for this triennium by 27·32 per cent., it is noteworthy that the rise is entirely in imports of silver, 117 lakhs, and that exports actually declined, the value of merchandise falling by nearly 7 lakhs. The figures do not however show the true balance of trade as remittances to banks in China by drafts on Rangoon banks are not shown in these returns. The enormous increase in imported silver is said to be due partly to the exchange of Chinese for British coin, which circulates freely in parts of Yünnan, and partly to sales of silver for export to Bombay. Raw silk from Ssuchuan which comprises 15 per cent. of the total value of imports for the triennium has risen in volume though the price has fallen : probably cheaper grades are being sent to meet the demand caused by the stoppage of supplies from Europe. Pigs, hides, orpiment for paint, and tea also figure largely among imports but hides have declined in volume and value owing to a fall in price in Burma.

The main exports are raw and manufactured cotton, fish and jade. While the volume and value of Indian twist and yarn are much the same as in the last triennium, piece-goods have fallen slightly in volume but heavily in value (11·72 lakhs) and the fall is not balanced by the increase in raw cotton (2·37 lakhs) of which the average price was lower than in the last triennium. Woollen manufactures, a large item in the former period, have almost disappeared.

As compared with 1915-16 the value of the trade in 1916-17 rose by 22·15 lakhs or 16·34 per cent., both imports and exports showing an increase. Among imports raw silk and silver are most noteworthy with increases of 4·49 and 9·55 lakhs respectively. In exports Indian twist and yarn has risen by 7·16 lakhs, an indication of a recovery which is somewhat discounted by the fall in the export of jade by nearly 50 per cent.

8. *Trade with the unadministered Kachin country.*—The comparative figures for this trade are shown below :—

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports	6·32	5·25	5·54	17·12	8·98
Exports	8·02	6·56	8·01	22·61	11·57
Total ...	14·34	11·82	15·55	39·73	20·56

This trade with the hill people on the borders of the northernmost districts of Burma is registered at Kamaing, Myitkyina, and, since 1913, at Mogaung. As the bulk of the trade is recorded at Mogaung, no true comparison with the previous three years is possible. The trade, which is carried on by petty traders, is mainly in common articles of food and clothing: pigs, fish, and gold dust are the principal imports, cattle, clothing, opium, salt and bazaar articles the principal exports.

Expansion is due in part to the development of the Putao district, and the increase in the volume and value of the 1916-17 over the 1915-16 trade, the value being greater by 1·73 lakhs or 14·64 per cent., shows that the set back in 1915-16 was temporary only. During the year exports increased by 1·45 lakhs or 22·09 per cent., imports by ·28 lakh or 5·33 per cent. only.

9. *Trade with the Northern Shan States.*—The following figures for the Northern Shan States include merchandise registered in the Bhamo and Ruby Mines districts, at Maymyo and railborne trade; part of the trade is Chinese but no separate figures are available:—

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports	145·86	165·71	213·37	524·95	395·69
Exports	151·40	166·68	298·18	616·26	376·63
Total ...	297·26	332·39	511·55	1,141·22	772·32

Expansion continues and the trade of the last three years is almost double that of the period 1909—11. As compared with the last three year-period the total value has risen from 772 to 1,141 lakhs or 48 per cent., imports and exports showing increases of 33 and 64 per cent. respectively. Metals, tea, hides, rice, gums and resins, oranges and potatoes loom large among imports. Metals now take first place, the enormous increase in value from 66·59 lakhs to 177·39 lakhs being due to the growing output of the Burma Mines at Namtu. Some antimony obtained in Möng-hsu is also shipped from Hsipaw. Large consignments of Chinese dollars and French "piastres-de-commerce" which come in through Kēngtūng State have been brought to Mandalay *vid* Hsipaw and sold at considerable profit. The quantity and value of oranges and potatoes have practically doubled, and gums and resins have fallen in quantity by 18 per cent. but risen in value by 121 per cent. The fall in the value of rice, 7·21 lakhs, which is exported mainly from Momeik State to the Ruby Mines is due partly to smaller demand consequent on slack trade. A growing demand for Tawngpeng tea is noted in the Ruby Mines.

Among exports manufactured cotton, metals, coal, rice, petroleum, fish, salt and miscellaneous bazaar goods are all important.

The activities of the Burma Mines were wholly responsible for the increases in iron 175 lakhs, coal 40 lakhs, and railway materials 13 lakhs, and partly responsible for the increases in rice, mostly railborne from Mandalay, petroleum and liquor.

Salt has risen in quantity and value and Shan traders are said to be trying to corner the market anticipating further rises, but tobacco has risen rather in price than in quantity. The demand for the cheap miscellaneous bazaar goods formerly supplied from Germany has been met with Japanese manufactures.

The year 1916-17 was noteworthy for an increase of no less than 179 lakhs or 54 per cent. over the trade of 1915-16, imports and exports growing by 29 and 79 per cent. respectively. To the Burma Mines' production are due the biggest increases in imports. Although wet tea declined slightly owing to the holding up of stocks in the absence of buyers, dry tea imports rose by 4 lakhs. Among exports cotton piece-goods rose in value by 4·49 lakhs due mainly to the rise in prices.

10. *Trade with the Southern Shan States.*—The trade with the Southern Shan States, for which figures are given below, is registered at stations in the Kyauksè, Yamèthin, and Toungoo districts, and at Kalaw, and statistics for rail-borne trade are obtained from the Burma Railway Company :—

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports	77·80	74·94	72·46	225·21	276·63
Exports	105·06	92·55	91·35	288·97	313·76
Total ...	182·86	167·49	163·81	514·18	590·39

Sixty-four per cent. of this trade is now carried by the Southern Shan States Railway.

Throughout the period there has been a continuous, if slight, decline and the total value for the three years is less by 76 lakhs or 13 per cent. than for the last triennium. Imports fell by 19 and exports by 8 per cent. in value. Animals, cheroot wrappers, foodstuffs, timber, and hides are the main imports, cotton and silk manufactures, fish, salt, spices, and silver the main exports. The decline in the import value of ponies by 7 lakhs and cattle by 21 lakhs is due to the smaller Burma demand, and a fall of 17 lakhs in the value of elephants is due to the falling off in purchases by timber firms. Rice, hides, and silver all declined in value but there were big increases in cigar wrappers, 5 lakhs, and leather, mainly in the form of Shan shoes, 4 lakhs, while the figures for wheat, 5·61 lakhs against ·43 lakhs in the previous triennium, indicate a most striking development.

Under exports wearing apparel has risen in value by 50 per cent. due mainly to the rise in prices which is also mainly responsible for the increased value of iron, 7 lakhs, and to a less extent of salt, 2 lakhs. The demand for cotton piece-goods has fallen off and a decline of 35 lakhs has to be recorded.

For the year 1916-17 imports were less by 3·31 and exports by 1·29 per cent., the total decrease in the trade of 1916-17 as compared with 1915-16 being nearly 4 lakhs or 2 per cent. The increased values of garlic, oranges, wheat, and lac balanced to some extent the lower values of animals imported while in exports the increases under oil, salt, and bazaar articles almost balanced the decline in cotton piece-goods, 5 lakhs, and iron, 3 lakhs.

11. *Trade with Northern Siam.*—The statistics for the trade with Northern Siam which is registered at stations in the Salween, Thatôn, and Amherst districts are shown below :—

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports	39·64	25·15	24·57	89·36	120·23
Exports	31·31	23·85	21·96	77·14	95·99
Total ...	70·95	49·01	46·53	166·50	216·23

Depression was continuous throughout the period and the figures disclose a total drop of 50 lakhs or 23 per cent. from the figures of 1911—13, imports and exports being responsible for 26 and 20 per cent. of the fall respectively. Cattle, elephants, teak, and silver are the principal imports, and the smaller demand for cattle in Burma is reflected in the fall of the value of cattle by 17 lakhs or 50 per cent. The rise in the value of elephants is due partly to increased demand by

Rangoon firms and partly to elephants being withdrawn from Siam consequent on less activity in the Siamese forests, to which the fall in the value of teak by 2·30 lakhs or 6·51 per cent. is also due. Smaller purchases by Indian traders from Siam who buy goods in Moulmein for cash are indicated by the fall in imports of silver.

The rise in prices of European merchandise and some diversion of trade with Northern Siam from Moulmein to Bangkôk, following on improvements in communications between Northern and Southern Siam, are the governing factors in the all-round decline in exports. The value of exports of European piece-goods has fallen by over two-fifths, of manufactured silks by one-half and of bazaar articles by nearly one-third. For the year 1916-17 the figures show a smaller decline than for the previous year but this is due mainly to the rise in prices and there is no sign of a recovery in trade.

12. *Trade with Southern Siam.*—The trade with Southern Siam is registered at stations in the Amherst and Tavoy districts.

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports	20·40	14·01	10·33	44·76	37·38
Exports	12·52	6·44	5·87	24·84	28·63
Total ...	32·92	20·46	16·21	69·61	66·02

Little general trade is recorded on these routes and the promise of the year 1914-15 when there was an increase both in exports and imports has not been fulfilled, the increase for the triennium in the total trade value by 3 lakhs being due wholly to the greater number and value of elephants imported in 1914-15 and 1915-16. Silk fell by 9 lakhs or over 50 per cent. Among exports clothing and piece-goods show comparatively small increases while silks and silver have fallen.

In 1916-17 the total value of trade fell by 21 per cent., cattle and elephants being less by 1 and 4 lakhs respectively, though there was a rise of over a lakh in silk imports.

13. *Trade with Karenni.*—This trade is recorded at stations in the Toungoo and Salween districts. The figures are shown below:—

	In Lakhs of Rupees.				
	1914-15.	1915-16.	1916-17.	Triennium, 1914-15 to 1916-17.	Triennium, 1911-12 to 1913-14.
Imports ...	27·41	22·89	25·87	76·18	98·22
Exports ...	11·01	6·69	12·90	30·61	48·88
Total ...	38·42	29·59	38·78	106·79	147·10

During the three years the total value of the trade fell by 27 per cent., imports being responsible for 22 and exports for 37 per cent. of the decline, which would have been greater but for the appearance among the returns for the first time of the wolfram, 13 lakhs in value, produced by the Mawchi Tin Mining Company. Ponies, cattle, elephants, teak, and silver all fell in value. Of exports betel-nut fell by 2, silver by 13 lakhs, while iorn rose by nearly 1½ lakhs.

The exhaustion of the teak forests has been mainly responsible for the general decline in trade but this is being off-set to some extent by the growing

mining activity which is especially reflected in the 1916-17 returns. The total trade of 1916-17 rose by 31 per cent. due to increases of imports in wolfram by 4 lakhs, and in exports of silver by 4 lakhs.

14. *Imports and exports of tobacco overland.*—In the following table is shown the quantity of tobacco imported into and exported from Burma by overland routes for the last triennial periods :—

	Triennium, 1911-12 to 1913-14. Mds.	Triennium, 1914-15 to 1916-17. Mds.
Imports	3,494	7,568.
Exports ...	39,301	48,901.

While the use of Shan tobacco is said to be growing in the north there has been no trade variation of real moment in tobacco.

15. *Imposts in the shape of taxes or tolls levied on transfrontier trade.*—Appendix V gives details of the taxes or tolls still levied on transfrontier trade. Since the last triennial report the only change has been in taxation on traders in part of French Indo-China as noted in the 1914-15 report. Further enquiries showed that the ferry charges reported in the 1915-16 report as new tolls levied by the Siamese ferry licensees were merely ferry charges and in no sense taxes or tolls.

R. E. V. ARBUTHNOT,
Commissioner of Settlements and Land Records, Burma.

RANGOON, *24th July* 1917.

MAP OF BURMA

SHOWING

TRADE ROUTES AND TRADE REGISTRATION STATIONS

1916-17

Scale: 64 miles = 1 inch.

COUNTRIES WITH WHICH TRADE IS CARRIED ON AND TRADE REGISTRATION STATIONS.

1. Trade with Western China is registered at Wuingmaw, Knau, China Street (in Bhamo Town), Myothit, Momauk, Mapein and Manet.
2. Trade with the Unadministered Kachin country is registered at Myitkyina, Mogaung and Kamaing.
3. Trade with the Northern Shan States is registered at China Street (in Bhamo Town), Manet, Silkan, Ngao, Kanuet, Kyaukpye, Kyaukthaka Bernardmyo, Kyaingsa and Mogmyo.
4. Trade with the Southern Shan States is registered at Taungdaw, Lankyaw, Ingon, Kalaw, Pyawbwe, Theingon, Tatkon, Thayetkon, Laikka, Kyaukkyi and Taungoo.
   (The statistics of Rail-borne trade with the Northern and Southern Shan States are compiled in the Railway Audit Office, Rangoon.)
5. Trade with Northern Siam and Raheng is registered at Thingan-gainaung, Kanaikan, Pa-an, Shangwethit, Papun and Kawkareik.
6. Trade with Southern Siam is registered at Thingan-gainaung, Kyaikdon, Kyaikseikkyi and Myitta.
7. Trade with Karenni is registered at Laikka, Toungoo, Kyaukkyi, Papun and Kawkareik.

NOTE

ON THE

TRANSFRONTIER TRADE OF BURMA

For the Year 1918-19.

INTRODUCTION.

1. The reasons given last year for dividing this Note into two parts still hold good, and this plan has again been followed.

PART I.

TRADE BETWEEN BURMA AND THE ADJOINING FOREIGN COUNTRIES.

2. The table below shows the value of trade during the year as compared with that of the year 1917-18 :—

Year.		1917-18.	1918-19.	Percentage of increase or decrease.
		Rs.	Rs.	
Western China—				
Import from	... ...	96,38,545	1,32,04,085	+ 37
Export to	... ...	91,20,910	1,42,30,457	+ 56
	Total ...	1,87,59,455	2,74,34,542	+ 46
Northern Siam—				
Import from	... ...	25,15,121	26,80,040	+ 7
Export to	... ...	23,25,239	16,97,817	— 27
	Total ...	48,40,360	43,77,857	— 10
Southern Siam—				
Import from	... ...	12,49,287	15,77,014	+ 26
Export to	... ...	4,38,856	5,09,783	+ 16
	Total ...	16,88,093	20,86,797	+ 24
Aggregates—				
Import	... ...	1,34,02,903	1,74,61,139	+ 30
Export	... ...	1,18,85,005	1,64,38,057	+ 38
	Total ...	2,52,87,908	3,38,99,196	+ 34

The distribution of this trade under merchandise, treasure and timber represents 60, 36 and 4 per cent. respectively. The increase of 86 lakhs or 34 per cent. in the total value of trade over the figures of the preceding year shows a satisfactory development of trade. This is partly due to the Armistice which improved conditions in the latter part of the year, and partly to the inflation caused by a sharp rise of price. On the other hand the influenza epidemic was a set-back to trade.

3. *Western China.*—The experimental stations started last year at Namhkam and Kangmöng in the Northern Shan States were again opened in December, though the Kangmöng station was shifted to the ferry at Kunlon. At Namhkam both exports and imports increased considerably, but at Kunlon whilst there was a large increase in exports there was a slight decrease in imports, probably due to the disturbed state of the Shan-Chinese States of Cheng Kang, Kengma and Möng Ting, which were infested by a large band of dacoits for two months of the open season.

The total value of the Western China trade is given in paragraph 2 where it will be seen that exports have increased much more than imports. There has been a rise in the prices of cotton and silk manufactured piece-goods owing to decreased importation by sea, and consequently 1,283 maunds valued over a lakh of cotton piece-goods (Foreign) of Chinese manufacture have been recorded for the first time as imported. Raw silk imports doubled in weight and were nearly treble last year's value. Hides, although decreasing in weight owing to the inferior quality of the Chinese hides imported, increased in value owing to high prices. Under exports raw cotton shows an increase in quantity by 8,196 maunds or 185 per cent. and by 5·37 lakhs or 336 per cent. in value, and cotton twist and yarn (Indian) by 8,120 maunds or 13 per cent. in quantity and 30·78 lakhs or 74 per cent. in value, owing to an increasing demand for unmanufactured cotton materials for manufacture of clothes for domestic use, due to a rise in prices of European piece-goods, which in consequence fell in quantity by 61 per cent. and by the same per cent. in value.

Export of silver, mainly for cash payments for imported raw silk, increased by 16·54 lakhs: and Chinese dollars to the value of 2·40 lakhs, which appear in the returns of Exports, were taken back as an exchange could not be effected with profit.

4. *Northern Siam.*—But for an increase of 7·91 lakhs in the value of imported teak the imports would show a decrease similar to that in exports. This is due largely to a decrease from 114 to 24 in the number of elephants imported with a corresponding fall in value as the result of large imports last year. The increase in tobacco imports is due to the development of the trade in cheap Chinese cigarettes *viâ* Papun. In exports apparel fell in value by 54 per cent. and cotton piece-goods (European) by 53 per cent. in quantity and by 31 per cent. in value. But European twist and yarn rose in quantity by 9 per cent. and in value by 29 per cent. A smaller amount of money in cash was exported to pay for the purchase of elephants, and this explains the decline in the value of silver from 11 to 5·21 lakhs.

5. *Southern Siam.*—It will be seen from the table at paragraph 2 that the value of trade advanced satisfactorily in both imports and exports. The chief articles of import are cattle, elephants, and raw and manufactured silk. Both cattle and elephants decreased by half in number as well as in value. But raw silk rose in quantity by 200 per cent. and in value by 351 per cent. Manufactured silk also increased by about 10 per cent. in quantity and by 34 per cent. in value. A feature of trade from this part is an importation of a cheaper kind of foreign cotton piece-goods (chintz) said to be manufactured in Siam and brought into the markets in the Amherst District for the first time, the quantity and the value of which were 37 maunds and Rs. 23,680 respectively. There was a great demand for cash and paper money was hardly acceptable in Siam, and in consequence silver exported increased from 2·41 to 3·28 lakhs.

6. *Frontier imposts.*—Taxes or tolls already levied on goods crossing the frontier remained unchanged since the publication of the report for 1916-17, and there is no further information to be recorded on this during the year.

PART II.

TRADE BETWEEN BURMA AND THE UNADMINISTERED KACHIN COUNTRY, THE SHAN STATES AND KARENNI IN BURMA.

7. The following statement shows the value of trade during the year as compared with that of the preceding year.

Year.	1917-18.	1918-19.	Percentage of increase or decrease.
	Rs.	Rs.	
Unadministered Kachin country—			
Import from	7,43,298	2,44,955	− 67
Export to	9,28,813	2,73,752	− 71
Total ...	16,72,111	5,18,707	− 69
Northern Shan States—			
Import from	4,11,34,491	3,96,67,575	− 21
Export to	3,94,40,137	3,35,24,126	− 15
Total ...	8,05,74,628	6,61,91,651	− 18
Southern Shan States—			
Import from	76,68,389	84,04,543	+ 9
Export to	1,15,91,441	1,17,40,478	+ 1
Total ...	1,92,74,780	2,01,45,021	+ 4
Karenni—			
Import from	22,49,840	23,52,888	+ 5
Export to	8,68,744	13,90,772	+ 60
Total ...	31,18,584	37,43,660	+ 20
Aggregates—			
Import	5,18,10,968	4,36,69,911	− 16
Export	5,28,29,135	4,69,29,128	− 11
Total ...	10,46,40,103	9,05,99,039	− 13

Merchandise, treasure and timber represent 81, 18 and 1 per cent. respectively of the above returns.

8. *Unadministered Kachin Country.*—The total trade with this part of the country declined by 11·53 lakhs or 69 per cent. due to over-trading of the past year, and to the influenza epidemic, which scared away the Hill Kachins from

the plains. Business in the Mines has also been slack, and the demand for ordinary articles was smaller than that of the previous year.

9. *Northern Shan States.*—The total value of imports and exports declined by 18 per cent. It should however be noted here that in the preceding year the returns received in the traffic department of the Burma Railways, from which the statistics of rail-borne trade are compiled, did not show the figures under silver, as specie is not included in the ordinary traffic returns compiled by the Railway Company. Arrangements have since been made with the Burma Railways, and the statistics for the year noted upon have been recorded complete. Excluding the figures under silver in order to get a fair comparison, the total value of merchandise imported and exported actually declined by 227 lakhs or 30 per cent.

The value of imports has declined by 84·66 lakhs or 21 per cent. but excluding the value of silver imported the actual decrease in merchandise was 141·86 lakhs or 38 per cent. due to the fact that the Burma Mines Company have sent down little zinc this year in comparison with the last. The decrease under the head "other metal," chiefly zinc ores, is 172·49 lakhs. The import of lead from the Mines remains nearly the same in quantity, but increased by 29 per cent. in value. Brass and copper imports, mainly in the form of Chinese cash, declined from 6,195 maunds to 5,106 maunds in quantity and from 6·14 to 5·25 lakhs in value, due to the Chinese Government prohibiting the export of coins to foreign countries. In these States the cotton, sessamum and potato crops were poor, and the imports of these commodities decreased in value by 1·01, 1·54 and 1·40 lakhs respectively. The quantity of pickled tea decreased by 3 per cent. but the value increased by 15 per cent. Black tea was more by 14 per cent. in quantity and by 19 per cent. in value.

Exports declined by 59·16 lakhs or 15 per cent. in value. The actual decline in merchandise, apart from the figures under silver, was 85·15 lakhs or 22 per cent. in value. The chief decreases were under coal and coke, iron and railway materials, due to less importation by the Burma Mines Company. Cotton twist and yarn increased by 11 per cent. in quantity and by 38 per cent. in value. On the other hand European cotton piece-goods fell in quantity by 13 per cent. but rose in value by 9 per cent. Petroleum increased from 101,057 maunds to 169,376 maunds in quantity and from 9·38 lakhs to 18·49 lakhs in value, owing to the increased consumption by the Burma Mines Company, who are now using less coal and timber fuel.

10. *Southern Shan States.*—The total value of the trade with these States shows a small increase over the figures of the preceding year. In imports ponies increased in number by 137 and in value by Rs. 26,000, as a higher average price was obtained than in the previous year. Garlic decreased by 4 per cent. in quantity, but the value rose by 36 per cent. Potatoes increased by 64,843 maunds in quantity and by 3·32 lakhs in value, as there was a substantial rise in the prices. Hides, stick-lac and paints also increased both in quantity and value, but on the other hand the values of cattle and elephants decreased by 41 and 54 per cent. respectively. Wheat fell in quantity by 6,455 maunds, but owing to higher prices the fall in value was only Rs. 7,000. The figures under *Thanatpet* (leaf for cigar wrappers) and oranges also show a falling off in quantity and value. The quantity of European twist and yarn exported was practically the same, but the value increased by 28 per cent. European cotton piece-goods decreased very heavily both in quantity and value. There were slight decreases in the quantities of dry fish and *ngapi*, but the value increased owing to a rise in prices.

11. *Karenni.*—The increase in the value of both import and export trade shows a recovery of the set-back of the preceding year. The principal articles of imports are wolfram and teak timber. Wolfram declined in quantity by 3 per cent., but the value advanced by 15 per cent. Teak timber fell both in quantity and value. Under exports iron fell in quantity, but rose in value. The value of silver advanced by 2·87 lakhs, mainly for the requirements of the Mawchi Mining Company.

W. E. LOWRY,
Offg. Commissioner of Settlements and Land Records, Burma.

RANGOON, *25th August* 1919.
